

ANIRBAN MAITY

State College, PA | 814-862-8781 | anirbanmaity218@gmail.com | linkedin.com/in/ani-psu

Professional Summary

Computer Science senior at Penn State with experience in **software engineering**, **AI/ML**, **robotics**, and scalable system development. Skilled in building intelligent platforms using **Python**, **ROS**, **Generative AI**, and full-stack tools. Strong foundation in **algorithms**, **simulation**, and applied machine learning. Seeking AI, robotics, or software engineering roles for 2025.

Technical Skills

Languages: Python, Java, C, C++, JavaScript

AI/ML Tools: Scikit-learn, Hugging Face Transformers, LangChain, OpenAI API, PromptLayer, TensorFlow

Web/Backend: Flask, MySQL, REST APIs, AWS RDS, Docker, Git, Linux, React

Robotics/Simulation: ROS, Gazebo, NetworkX, NumPy, Matplotlib, PyGame

Other: Algorithm Design, Generative AI, Large Language Models (LLM)

Education

Penn State University

Bachelor of Science in Computer Science — Minor in Computer Engineering **GPA: 3.2**

Expected Dec. 2025

University Park, PA

Professional Experience

Research Intern — AI & Robotics (PRM & RRT Navigation)

May 2025 — Present

NIT Rourkela

India

- Developed 2D hospital simulations comparing **PRM** and **RRT** algorithms for autonomous robot navigation.
- Reduced path length by **15%**, optimized planning efficiency, and modeled real-world access constraints.

Research Assistant — Generative AI Systems

May 2025 — Present

Penn State University

University Park, PA

- Built modular **Generative AI** platform using **LangChain**, OpenAI APIs, and custom prompt engineering.
- Conducted extensive **latency**, **reliability**, and **bias testing** for LLM tools in healthcare/education.

Full Stack Engineer — Threshold Platform (Capstone)

Jan 2025 — May 2025

Penn State College of Engineering

University Park, PA

- Developed backend for real-time physiological dashboard for first responders using **Google Pixel Watch** and **Mantis X3**.
- Ensured **HIPAA** and **GDPR** compliance, enabling secure health data handling.

Key Projects

Campus Enrollment Management System

2022

Penn State University

University Park, PA

- Designed a student enrollment system in **Java** with functionality for course add/drop operations, input validation, and efficient record management.

Diabetes Detection Platform

2025

Penn State University

University Park, PA

- Built ACT-R + Random Forest hybrid AI for medical diagnosis with fairness checks and interpretability.

Certifications

Microsoft AI Professional Program — Microsoft (2023)

Intro to Deep Learning — PowerAI (2023)
